

## Slimline 15 Wide

### Profile 2m AL PCO Wide

Slimline 15 Wide is an aluminium profile with a clean-lined design. Surface mounting on a ceiling, on a wall, or beneath worktops. A mounting bracket and end pieces with or without wire opening are available as accessories. The profile can be used with all Airam's 12 V and 24 V LED strips and with connector ranges compatible with them. The profile has a high structure, which diffuses the LED strip's sharp light, making it ideal for applications where its surface remains visible.
